WORK EXPERIENCE

fumi.co, Curitiba/Remote — *Lead Developer*

02/2022 - PRESENT

· Led the development of a online store system, with delivery tracking feature for the b2c and b2b industry

· Structured the development team, helped scope and define tasks, and maintained code quality through pair programming and code review of 3 other developers.

· The system was composed of an API written in NestJS with typescript. and 4 client applications: b2c app, admin dashboard, react native delivery app, and a vending-machine app/system.

Cargill LATAM, Remote — *Full Stack web developer*

09/2021 - 02/2022

· Joined a existing project in the agricultural b2c sphere and helped accelerate it's development

· Frontend development of a PWA application written in React

· Backend development of a NestJS API

Ruptiva (software house), Remote — *Full Stack web developer*

10/2020 - 09/2021

· Solo developer of a instagram-inspired social network

· Responsible for solving difficult development problems

· Development and maintenance of React Native applications

· Development and maintenance of new features in React/Laravel legacy software

EDUCATION

UTFPR, Curitiba — *interrupted*

03/2017 - 07/2018

· Bachelor of Information Systems in one of the best courses/universities of the country

· Strong logic and programming ability compared to peers - largely due to my interest in competitive programming
